perspective

A CENTURY OF ENTREPRENEURSHIP

Our Mountain Center rests on three pillars of heritage:

location, entrepreneurship, and medicine

WHY MOUNTAIN CENTER?

Balancing work and family commitments:
Medical Center

Dealing with labor shortages:
Business Center

Achieving Impact Through Tourism:
Asthma Center

Ease everyday life
Secure the future
Recharge energy

Before you continue, take a moment to reflect on your
priorities! What really matters to you?

Time? Power? Money?

Our innovations address these needs!

Balancing work and family commitments

MEDICAL CENTER

Coordination of communication between families, experts and institutions provides lasting support to people who balance demanding work with caring for family members, to those who live alone, and to those who struggle to navigate the challenges of illness and old age.

BUSINESS CENTER

At the Mountain Center, innovation lies in engaging experts from different professional fields who do not usually collaborate.

Value arises from the diversity and complementarity of perspectives in interactions beyond traditional frameworks of collaboration, supported by international networking.

Preserving

impact
through
tourism

ASTHMA CENTER

The unique location of the Mountain Center — within coniferous forests in close proximity to the sea — creates a natural laboratory for the development of special recovery and rehabilitation programmes for people with asthma.

The Asthma Center is also a place of professional dialogue — a space where different approaches, ideas and business perspectives in contemporary pulmonology meet.

INNOVATIVE, CONCRETE AND PRACTICAL

Working with the Mountain Center means drawing on our experience in business innovation, development, optimization and management — from medicine and tourism to the pharmaceutical industry and real estate.

Working with us means sharing infrastructure and human resources while preserving individuality.

PATHS TO SUCCESS

- 30 YEARS TELEMEDICINE
- STRATEGIC POSITIONING
- TRANSDISCIPLINARY COORDINATION
- COMMUNICATION TOOLS
- EMPLOYEE HEALTH

YOUR CHANCES FOR SUCCESS

We recognise the challenges posed by labour shortages, particularly those related to health and demographic changes.

We understand the contemporary challenges employers face and support them in preserving employees' ability to work and in balancing their professional and private lives.

Creating
value for
your clients,
employees
and you

So many entrepreneurs are so busy chasing new customers into their front doors, they can't see the existing customers escaping out the back door.

DYNAMIC BUSINESS MAKES US DIFFERENT

We put you in a competitive market position because we know how to listen to and truly hear your customers.

At the same time, we observe your competitors, avoid their mistakes and learn from their successes.

Challenging
business
conditions
require new
approaches
and flexible
support

Identifying new sources of revenue
alongside an objective assessment
of costs and potential savings.

Conversations
that change
decisions

OUR CAPACITY + RESPONSIBILITY = YOUR TIME

Our capacity derives from the development and management of communication tools and infrastructure, as well as from coordinating communication between families, experts and institutions.

In this way, we shorten the path to relevant perspectives and create the conditions for more well-founded decisions.

It was our
pleasure to
collaborate with
them and an
honour to work
for them
